

LEADER'S SPIRIT ENERGY

MY LAND

Specially made for:

The unique blend of natural grass haylage, which can be a great main feed for competition horses as it has very good calcium (Ca) and phosphorus (P) ratio or additional feed of any horse, especially for young horses as it has good amount of protein. This is a great product for its grassy structure and naturalness, which can not only help to improve the horse's diet, but the change of concentrate feed required to ensure adequate nutrient level.

„Leader's Spirit Energy“ is a 100% natural product - mix of 7 types of grass. It contains 100% of Gramineae grass. Such composition enriches horse's diet with proteins and vitamins, including potassium, magnesium, calcium, carotene and others.

Feeding:

We recommend introducing our haylage to the horse's ration slowly, within 10 or 15 days, starting with only a small amount 3-4 times a day and gradually increasing dosage until you reach the recommended ration, i.e. approximately 1,5-2 kg of haylage should be given to your horse per 100 kg of its total weight per day. From the moment the bag is opened, it should be used within 2-3 days.

Laboratory findings:

Dry matter (DM) 66 -72 %; Energy (ME) 9 - 10 MJ/kg (DM); Protein 11-14 % (DM); Sugar < 4 % (DM); Fiber 35 - 40 % (DM); pH 5,5 -6

Certified product

LEADER'S SPIRIT SPECIAL

MY LAND

Specially made for:

This is a great feed for medium and hard - working horses. This feed is an energetic value corresponds to concentrated feed, but it is healthier and more natural for your horse. Haylage is highly nutritious and has a significant amount of protein and carbohydrates, which may allow a reduction in the amount of feed fed concentrate and to ensure the smooth functioning of the digestive system due to higher fiber content.

„Leader's Spirit Special“ is a 100% natural product - mix of 5 types of grass. It contains 80% of Gramineae grass and 20% of Leguminosae grass. Such composition enriches horse's diet with proteins and vitamins, including potassium, magnesium, calcium, carotene and others.

Feeding:

We recommend introducing our haylage to the horse's ration slowly, within 10 or 15 days, starting with only a small amount 3-4 times a day and gradually increasing dosage until you reach the recommended ration, i.e. approximately 1,5-2 kg of haylage should be given to your horse per 100 kg of its total weight per day. From the moment the bag is opened, it should be used within 2-3 days.

Laboratory findings:

Dry matter (DM) 66 -72 %; Energy (ME) 8- 10MJ/kg (DM); Protein 9-10 % (DM); Sugar < 6 % (DM); Fiber 32 -37 % (DM); pH 5 -5,5
